## REASONS FOR ALLOWANCE

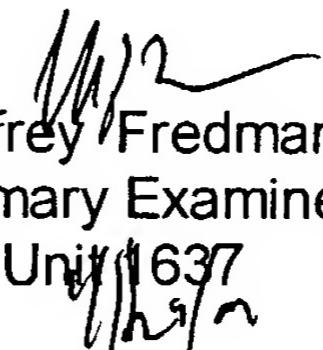

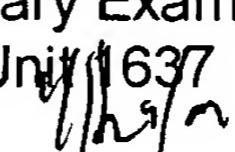

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the use of a stem loop type probe for detection of nucleic acids where the stem loop probe is altered prior to detection and the altered probes are not detected. The primary cited prior art is that of Tyagi, who teaches molecular beacons which meet the structural constraints of the claim. However, the substantive art of Tyagi teaches away from the claim as amended, because the entire point of the Tyagi molecular beacons is that there is no need to remove the altered probes. Therefore, in view of the teaching away of Tyagi and the amendment in which the structured probes must be altered but altered probes not be detected, the claimed invention is novel and unobvious over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Fredman whose telephone number is (571)272-0742. The examiner can normally be reached on 6:30-4:00.
